SUMMARY

Backend Developer, AI/ML Engineer & Desktop App Developer with 9 months of professional experience at RTC League. Specialized in FastAPI, PostgreSQL, Redis rate limiting, and Tauri-based desktop apps. Launched hintmint.io — a real-world production product. Passionate about building smart, scalable, and production-ready systems.

EXPERIENCE

*RTC League, **Backend Developer & Desktop App Developer***

Oct 2025 - Jun 2026

- Built production-ready REST APIs using FastAPI with async architecture and JWT auth.
- Implemented Redis for caching and rate limiting to protect API endpoints and ensure fair usage.
- Designed and managed PostgreSQL databases — schema design, migrations, query optimization.
- Launched hintmint.io — a live production web product with FastAPI backend, PostgreSQL, Redis, and rate limiting.
- Developed cross-platform desktop applications using Tauri (Rust + Web), delivering lightweight production-ready apps.

*Self-Initiated Project, **LangChain AI Agent Creator***

2024 - Present

- Developed an AI agent using LangChain for document search and intelligent automation.

*Personal Project, **AI Assistant Developer***

2023 - Present

- Built a Python-based AI assistant using NLP to answer questions, handle tasks, and process text.

*University Project, **Fuel Dashboard Designer***

2023 - Present

- Created a Python dashboard to analyze and visualize fuel consumption using Pandas and Matplotlib.
